### PROJECT UPDATE

The City's Contractor, Pavers, Inc., is set to begin pavement resurfacing on Michael Dr, Westplains Rd between Pawnee Dr and Pontiac Dr, and Aberdeen St on August 21st. Construction is expected to last 1 week, weather permitting.

The contractor will cold mill all of the existing street pavement for each section, perform any street base repairs within the section and place the new street pavement in phases.

Access to the homes and streets will be maintained during the cold milling operations with flaggers. Short term access restrictions will occur during the placement of the new asphalt paving.

Cold milling will remove the upper section of the existing street surface.

Access will be restricted at times during construction

We appreciate your patience during construction of the project.

Hot mix asphalt (HMA) paver will place the new road surface
